Light Shade
STUDIO

MADE IN BRITAIN

Shade Carrier 9 inch

A shade carrier is required where a lampshade has a duplex ring at the top of the frame. It is secured to a table or floor lamp base and held in place with the bases shade ring. The shade can then be positioned onto the top of the shade carrier. Our shade carriers are available in a variety of different sizes enabling the shade to be positioned at varying heights.

White powder coated and including a plastic reducer, our shade carriers are suitable for a base with an E27 (ES) or B22 (BC) lampholder. See our **product guide** for more information.

Product code: **SHA89**
