Spider Unit for Duplex Shade

A spider unit is required where a pendant lampshade has a duplex ring at the top of the frame. It is secured to an electrified suspension held in place by the shade ring or lampholder skirt. The shade can then be positioned onto the top of the spider unit.

White powder coated and including a plastic reducer, our spider units are suitable for a pendant fitting with an E27 (ES) or B22 (BC) lampholder. See our **product guide** for more information.

Product code: **SHA91**
