

How to *Order...*

1 Order samples

You can request samples of our silk fabric colours by visiting one of our approved retailers. This gives the opportunity to check colours against your interior scheme.

2 Select your shade

Our shades come in different shapes and sizes, so it's important that you select the size that's right for you. You'll see throughout our catalogue that each shade has a unique base code, for example DRS40, which is our Shallow Drum 40cm silk shade. This unique code refers to the range name, shape and size of the product and is the first part of your ordering code. Once you've selected your base code, move on to step 3...

3 *Select your colour*

Each of our silk fabrics has its own reference number, so once you've decided on your silk colour, simply add the reference number to the base code. For example, Taupe silk is referred to as 01. Add this to your base code to specify the shade size and colour that you would like to order.

DRS4001 - Shallow Drum 40cm silk shade in Taupe.

4 *Select your lining*

Many of our shades are available with a choice of lining options. If you require white laminate, simply order the base code + your colour reference number. For example, the DRS4001 will be supplied with white laminate as standard.

If you wish to add a Gold, Silver or Bronze metallic lining, then simply add the abbreviation of your lining choice to the shade code you've created. For example, the Shallow Drum 40cm in Taupe with Gold lining = DRS4001/GD

Some of our shades have the option to create a two tone silk effect. This enables you to create a truly bespoke product where you can specify the outer and inner colour in silk. All you need to do is add 99 to your chosen base code and specify the colours you require. For example, DRS4099 - Peony outer, Taupe inner.

5 *Place your order*
